The NMMA-Certified label on an Avalon pontoon boat lets you know it was built to meet, and often exceed, the industry's strictest quality and safety standards for critical components, such as electrical systems, powering, flotation, fuel systems, and navigation lights. Certified boats must also pass rigorous annual inspections from independent third-party inspectors. According to U.S. Coast Guard statistics, NMMA-Certified boats have been shown to be safer than non-certified boats.

The logo for Avalon, featuring the word "AVALON" in a bold, white, sans-serif font. The letters are closely spaced and have a slight shadow effect, giving them a three-dimensional appearance as if they are floating or attached to a surface. The background behind the text is a dark blue gradient with subtle, wavy lines that suggest water or a sky.
